

AFI Drivers Test Software Instructions

<http://afrc.avianoab.info/inbound-driving.html>

Congratulations on your assignment to Aviano AB! Below you will find numbered instructions on how to install the AFI Driver's License Test application. Please read this whole document thoroughly as it will help you in completing the AFI Driver's License Test.

- 1.** Click on the AFI Drivers Test Software link and save the AFI Driver's License Test.Zip to your PC Desktop.
- 2.** Once you have downloaded the file, open it up. You will need some sort of zip software to do so. If you do not have any software to open the zip file, there are some very common software applications that are easily attainable with WinZip being the most popular.
- 3.** Once the zip file has been opened, you will then need to extract the contents to a directory of your choosing. It is recommended to place on your computer desktop or any easily accessible folder. It will create a new directory called "AFI Driver's License Test."
- 4.** Double click on the "AFI Driver's License Test" folder.
- 5.** You will now see a number of files. The only one that matters to you is the start.exe or start file.
- 6.** Double click the "start.exe" or "start" file. This will begin the AFI Driver's License Test environment. Below are some more instructions on the actual testing environment.
 - a.** There are two tests that need to be taken: "AFI Written Test" & "AFI Signs Test." Select one and complete the test. You must score 100% to pass. Once you have passed one, then you must move on to the next test and complete that test with a score of 100% as well.
 - b.** AFI WRITTEN TEST- This test has 30 questions. Some will be multiple choice and others true or false. Mark the best choice for each question. Each question will have only one correct answer.
 - c.** AFI SIGNS TEST- This test has 50 questions. You will be asked to match sign definitions with the correct sign picture. The "Hotspot" button contains a diagram of all 50 signs from which to choose from.
 - d.** In both tests, there is an option in the top left corner of the application to mark a question for review. All this does is allow you to continue taking the test and at a later time, go back to answer the question that you have marked for later review.
 - e.** Once you have completed a test, a test summary report will show up on your screen telling you how well you did on the current test. If you got a 100%, create an AFI Certificate.
 - f.** In the "AFI Driver's License Test" folder, double click on AFI_Cert.exe. You will be prompted to enter your full name. After you type in your name, click on the "Create Certificate" button. This will create an AFI_Cert.htm file in the "AFI Driver's License Test" folder. Open this file and print out the results. Note: This certificate will provide a snapshot of your results (100% is required).
 - g.** Present the two test results to the 31 SFS Licensing Office.
